The purpose of these two new addition is to ensure that students are in the correct endorsement. The endorsements MUST be determined upon student enrollment.

If you discover that a change needs to be made in regards of student diploma type or requirement group during the graduation process, this is a great opportunity to make the corrections. The registrar will receive the final graduation confirmation with the new codes and they can make eSchool to match.

For the Diploma type, we use the majority of the time 34- Foundation HS TC 1021 but we want all the options available for you to choose.

For the Requirement Group We use most of the time 34_26 or 34_22 but you do have access to all the options available for you to choose.

I have attached a presentation that can help with the endorsement
